

MIDAS - Bond Opportunities I - Acc

Monthly summary report | as at 31 January 2019

Investment Objective

The fund seeks to achieve capital appreciation over the medium term by investing in a diversified portfolio of Euro-denominated fixed income securities (investment-grade corporate bonds, government bonds, high yield and emerging market debt as well as convertible bonds). The main focus is put on bottom-up selection. Interest rate as well as credit risks are managed actively.

Market Review

Markets started 2019 on a positive note. On one hand, risky assets performed well with investors returning after the Q4 2018 selloff. They were supported by central banks (Fed, ECB) turning less hawkish due to the economic outlook deteriorating and subdued inflation. Driven by the equity rebound (Euro Stoxx 300 +6,3%), corporate bonds performed well (Bloomberg Barclays IG index +1.09% and HY index +2.14%) and spreads tightened broadly (IG -8 bps and HY -56 bps on these indices). Eurozone government spreads also narrowed for most countries (France -6 bps, Spain -13 bps, Italy -6 bps).

On the other hand, government bond yields dropped as the Global economic slowdown is taking shape (GDP deceleration in Europe and in China; drop in business and consumer confidence, even in the USA). The German 10Y yield decreased by 9 bps to 0.15%, its lowest level since 2016. The longer end of the yield curve flattened sharply (German 2-30Y -18 bps).

Portfolio Performance

The fund gained 0.86% in January. High yield bonds (incl. Dufry, Selecta, Nidda, Spie) contributed the most as credit spreads tightened sharply, despite some underperforming names (Sarens, Atalian). Government bonds (Germany, Netherlands) gained as yields fell, while IG corporate bonds also benefited from spreads narrowing.

Market Outlook

Despite the market bounce, we remain cautious for the coming months. Advanced indicators warn that economic activity should moderate and then put pressure on companies. As a result, we took advantage of the market rebound to reduce exposure to risky assets (IG corporates bonds; HY bonds, especially single B; CLOs). Instead, we reinforced short-term IG corporate bonds and we maintained our exposure to government bonds. We also participated in one of the first primary issuance of the year (Auchan 24) which offered an attractive yield pick-up (new issue premium of about 40 bps).
